- Python & SQL
- Data Cleaning & EDA
- Statistical Analysis
- MySQL / Database Management
- Excel, Power BI
- Git / GitHub

EXPLORING

- Advanced Data Visualization
- AI-assisted Workflows (ChatGPT, Claude)

PROFILE

Information Engineering Technology student focused on Data Analytics, with experience working with Python, SQL/MySQL, data processing, databases, and data-driven applications. Strong academic foundation in data mining, probability and statistics, database systems, and artificial intelligence. Experienced in using AI tools and models, including ChatGPT and Claude, to support data analysis, problem-solving, research, and technical workflows.

EDUCATION

Bachelor of Science in Information Engineering Technology
University of Lahore • Expected Graduation: 2027

RELEVANT COURSEWORK

- Data Mining
- Probability & Statistics
- Database Management Systems
- Artificial Intelligence
- Advanced Backend Development

PROJECTS

ShieldNet — Final Year Project
Tech: Python, Flask, MySQL, DeepFace, OpenCV, React.js, Flutter Dart
A three-member team project: an anonymous cyber-harassment reporting platform with AI-based image analysis using DeepFace and OpenCV. Owned the Flask backend and AI integration.

BrainBattle
Tech: Django, React.js, MySQL
Quiz and trivia platform with authentication, categories, a leaderboard, and a scoring system.

Sentiment Analysis Dashboard
Tech: Python, Flask, TextBlob
Web app that analyzes text sentiment and returns positive, negative, or neutral results.

Resume Analyzer
Tech: Python, Flask, PyPDF2, NLTK
Extracts and analyzes resume content to provide keyword suggestions and skill detection from uploaded PDF files.
